Lab-02 Checklist

Before

- [ ] I am using only supplied mock data.
- [ ] I confirmed the tool URL and training scope.
- [ ] I will stop if the environment differs from the instructions.

During

- [ ] Step 1: Compare each sender domain in mock-inbox.csv with the approved supplier domains; inspect every character.
- [ ] Step 2: Mark persuasion cues such as urgency, authority, secrecy, changed payment details and unusual attachments.
- [ ] Step 3: Use Regex Generator to create a pattern that flags the supplied lookalike-domain examples without matching the approved domains.
- [ ] Step 4: Test the expression on every sample; record true positives, false positives and false negatives.
- [ ] Step 5: Draft a safe verification message and a call-back procedure that uses a previously known contact channel.
- [ ] Step 6: Decide which emails require immediate escalation and name the recipient role, urgency and evidence to include.

Before submission

- [ ] Annotated inbox
- [ ] Tested regex
- [ ] Detection test results
- [ ] Independent verification script
- [ ] Escalation decision
- [ ] Screenshots are redacted and contain no real personal or secret data.
- [ ] My conclusion distinguishes fact from inference.
