Lab-07 Checklist

Before

- [ ] I am using only supplied mock data.
- [ ] I confirmed the tool URL and training scope.
- [ ] I will stop if the environment differs from the instructions.

During

- [ ] Step 1: Group the mock assets by trust level, data sensitivity and operational role.
- [ ] Step 2: Use the IP Calculator to create non-overlapping training subnets sized for each group.
- [ ] Step 3: Record network address, usable host range, broadcast address and proposed gateway for each zone.
- [ ] Step 4: Draw allowed flows and deny-by-default boundaries between staff, guest, point-of-sale and management networks.
- [ ] Step 5: Identify which services, if any, need internet exposure and add a monitoring or access-control requirement.
- [ ] Step 6: Review the design for excessive trust and document one residual risk.

Before submission

- [ ] Subnet plan
- [ ] Asset-to-zone mapping
- [ ] Allowed-flow matrix
- [ ] Exposure decisions
- [ ] Residual risk
- [ ] Screenshots are redacted and contain no real personal or secret data.
- [ ] My conclusion distinguishes fact from inference.
